r-PET / PET

virtuous circle
cercle vertueux

The diagram illustrates a circular economy for PET. It starts with 'PET / r-PET materials' (Matières PET / r-PET) which are processed into 'PET / r-PET particles' (Particules PET / r-PET). These particles are then used to create 'PET / r-PET yarn' (Fil PET / r-PET), which is spun into 'PET / r-PET textile' (Textile PET / r-PET). Finally, the textile is used to create 'New PET / r-PET products' (Nouveaux produits), which can be recycled back into materials, completing the virtuous circle.
